

Production 3-Tier AWS Infrastructure

Secure • Highly available • Reproducible with Terraform

PORTFOLIO ARCHITECTURE

Security & operations

Cross-cutting controls for every tier

- IAM + Session Manager**
No inbound SSH; scoped instance role
- KMS + Secrets Manager**
EBS, S3, RDS, logs and credentials
- Amazon S3**
Application data + ALB audit logs
- CloudWatch + SNS**
Logs, dashboard, metrics and alerts
- Terraform remote state**
Versioned S3 state + native lock file
- GitHub Actions OIDC**
fmt • validate • TFLint • Checkov • plan
- CHANGE CONTROL**
Plan → approval → exact apply
